## **RESEARCH EXPERIENCE:**

Chemistry Young Scientist award, 2011 from Indian Council of Chemists to Research work presented by research Scholar.

Expertized in the synthesis and development of synthetic strategies for various hetero and carbocyclic moieties of biological interest. Worked with Professor H. Junjappa on developing novel synthetic methodologies for the carbazole and carboline derivatives, which are presumed to be potential agents for the topoisomerase inhibition. New Indole derived Indole-2,3-quinodienolate was generated and studied for its reactivity with various electron deficient dienophiles to yield broad spectrum of carbazole derivatives. For the first time air sensitive indoxyl was trapped to indoxyl-S,S- acetal, which we have exploited as a common intermediate synthon for the synthesis of variety of new carbazole and carboline derivatives, which otherwise involve either circuitous reaction pathways or drastic reaction conditions and hitherto costlier chemicals. We have been successful in hetero atom assisted lithiations and further exploitation of resulting carbanions in organic synthesis. Deprotonation of harmine alkaloids and subsequent reaction of the anion with oxoketene dithioacetals to yield compounds analogous to alkaloids has been studied. Also worked on Oxoketenedithioacetals to a diverse functionally substituted carbocycles, heterocycles, cyclopentenes and polyene-esters. Generated dianion and studied its reactivity towards various annulation reactions. Worked with Dr. R.A.Viswakarma, Bio-organic chemistry, National Institute of Immunology, New Delhi for the synthesis of alkyl acylated phosphatidylinositols, which are presumed to be active against leishmaniasis. Worked on conducting polymer synthesis at the chemistry department, National Tsing Hua University, Hsinchu, Taiwan. Served at GITAM University from 1997 to 2008. Elevated to Professor in 2008, at SCAS, affiliated to Acharya Nagarjuna University. Professor in the Department of Chemistry, Krishna University since September 2009. Presently, heading Krishna University PG centre, Nuzvid designated as Special Officer. Guided research students for the award of M.Phil. and Ph.D. degrees from various Universities. Two Major Research Projects completed with the financial assistance from the University Grants Commission. Established research collaborations with several academic and research organizations and also with reputed industries. Research projects supported by APSCOST and Industry are successfully completed. DST Project in hand. Honorary adviser, Pharmaceutical companies. Designated as Fellow of Royal society of Chemistry (London). Also designated as fellow Andhra Pradesh Akademi of Sciences.
